

Land Soft™ Semi trailer pads

PRODUCT INFORMATION BROCHURE

The Original **Land Soft™** Semi trailer pads

Protects against metal semi-trailer landing gear shoes from damaging your concrete trailer pads, asphalt driveways and asphalt field surfaces.

Our pads will stop your pads from wearing out!

Land Soft™ Semi trailer pads

MADE IN THE USA 

Forklifts make metal semi-trailer landing gear shoes dance in a circular motion creating holes over a short period of time on your expensive concrete trailer pads

Land Soft™ special formulated rubber will stop metal landing gear shoes from breaking concrete and asphalt materials as well as absorb heat from a surface to maintain a cooler semi trailer foot print. Why not finish that sand or gravel lot you have always wanted to pave!

Whether you operate out of a new transportation hub or a well-established one, prevent your busiest loading bays from being shut down while an expensive contractor bogs down your logistic performance. Keep your risk management team from pulling their hair out of their heads!

Land Soft™ Semi-trailer pads

Our Pads will stop your pads from wearing out!

A Driver can install a pair in minutes with just an adjustable wrench and hammer. Leave the pads on permanently or remove them in just minutes.
